

MODWOOD

Marina Board

Available in a variety of colours and finishes

The Sustainable Alternative

MARINA Board – The Ideal Choice for Commercial Applications in Australia’s harsh environment.

The Marina board has been designed for board walks, marinas, heavy duty decking areas and outdoor furniture.

The 137 x 32mm board is particularly suited for ecological sensitive areas, as there are no nasty chemicals that could leach out. It is highly resistant to the ravages of salt air or the harsh Australian elements and stands up to heavy foot traffic.

- ✓ **Approx. 90% recycled materials**
- ✓ **No paint, stain or oil required – ever!**
- ✓ **Resistant to termite and insect attack**
- ✓ **Will not split, rot or warp**
- ✓ **Standard length 4.2m, custom length available***
- ✓ **Cuts and drill like timber**
- ✓ **Spans 600mm centres**
- ✓ **Australian owned and manufactured**

Each lineal metre of ModWood Marina board contains approx. 50 recycled plastic milk bottles and almost 3 kilograms of reclaimed timber.
